### Glass Fragment Homework

Answer the following questions based on your lecture notes and the information you gathered from your lab.

- What type of glass is suspect #1?
  
- What type of glass is suspect #2?
  
- 3. What type of glass is crime scene #1?
  
- 4. What type of glass is crime scene #2?
  
- 5. Which vehicle do you believe was involved in the hit and run (suspect #1 or suspect #2)?
  
- 6. Where could the other sample from the crime scene have come from? (2 pts.)
  
- 7. List five examples of physical characteristics.
  
- 8. Does density change depending on the size of the sample? Why or why not? (2 pts.)
